EDUCATION

- Guru Ghasidas Vishwavidyalaya (A Central University)** Bilaspur, CG, India
Bachelor of Technology - Computer Science and Engineering; GPA: 9.20
Courses: AI, Machine Learning, Formal Language and Automata theory, Data Mining
July 2020 - May 2024

SKILLS

Programming Languages: C++, Java, Python, JavaScript, TypeScript, Solidity
Frameworks: React.js, Next.js, Express.js, Node.js
Blockchain: Ether.js,AlchemyAPI
ML: TensorFlow, Keras, OpenCV, NumPy, Pandas
Databases: MySQL, SQLite, MongoDB, Postgresql
Tools/Technologies: Git
Cloud: AWS

EXPERIENCE

- Proxikle** remote, India
Software Engineer I *Oct 2024 – Mar 2025*
 - Built BlockWorth Analyzer a fully responsive tool for crypto unit conversion, price tracking, and profitability analysis using React.js, Tailwind CSS, MUI, and TanStack Router.
 - Implemented secure user authentication with AWS Cognito and integrated a PostgreSQL + Rust backend to ensure efficient and scalable data management.
 - Developed modular, reusable components in TypeScript and React, enhancing the performance and maintainability of the company's core accounts application.
- Google Developer Student Club (GDSC), GGV** Bilaspur, India
Competitive Programming Executive *July 2023 - June 2024*
 - Led and organized competitive programming contests and coding challenges, boosting student engagement in problem-solving.
 - Conducted workshops and training sessions on algorithmic problem-solving and CP fundamentals to enhance students' coding skills.

PROJECTS

- BlockMath TokenWise: Unit, Price Profit Tool ([Live Demo](#))** — **Typescript, JavaScript, React.js, Tailwindcss, Redux, Tanstack Router, Material UI, Phosphor Icons, AWS Cognito**):
 - Built BlockWorth Analyzer – a fully responsive tool for crypto unit conversion, price tracking, and profitability analysis.
 - Used Alchemy API to fetch real-time cryptocurrency prices, enabling accurate and dynamic value conversions and profitability calculations.
 - Integrated AWS Translate to support multilingual conversions, improving global user accessibility and enhancing the overall UX.
- MERN STACK BLOG with Admin Control Panel ([Github Repo](#))** — **Reactjs, Tailwindcss, Javascript, express.js, mongoDB, Jwt, Firebase, node.js, redux toolkit**):
 - Secure user authentication is handled through JWT and Google Firebase Sign-In, enabling easy login with Google accounts. Admin users have special permissions to manage content, including deleting posts.
 - Users can comment on blog posts and filter posts by topic, making it easy to engage with content and discover areas of interest.
 - Admin users have full control over platform content, including the ability to delete inappropriate or outdated posts, ensuring a high-quality user experience.
 - The platform uses MongoDB for flexible data storage and Tailwind CSS for a fully responsive UI with light and dark mode, ensuring seamless access across all devices.

RESEARCH

- Stock Price Prediction using LSTM:** Built an AI-powered stock price prediction system using LSTM; currently exploring its application in vulnerability detection (In Progress).

COURSES AND CERTIFICATIONS

- Web Development: The Complete Development Bootcamp** (Udemy)
- Advanced React.js: In-depth Knowledge** (Udemy)
- Cloud Engineer Learning Path** (Google Cloud Skill Boost)
- Azure AI Fundamentals** (Microsoft)
